-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 4 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Gulledge (6601675). Gulledge discloses a hinged frame spreader 26/30 for maintaining a pair of frame sides spaced apart a desired distance during installation; the frame spreader comprises:

- A first and second board 26 hinged together by a pivotable hinge 30 connected to inner edges of the boards forming a hinge frame spreader board
- The first/second board each comprises an elongated board having a smooth inner edge and the boards interconnecting along the smooth inner edges by a hinged connection
- Each board having an outer edge shaped to conform to an inside profile of a side of a frame member: see figures 4-5
- The hinged frame spreader having a preset length providing a desired spreader distance between the pair of sides of the frame equal to the length of the hinged frame spreader board; see figures 4-5
- The hinged frame spreader adapted for being pivoted into an angled configuration and the hinged spreader being adapted for being adapted in a

straight linear configuration to contact a pair of sides of the frame and maintain the sides of a frame spaced apart; see figures 3a and 3b

- An elevating member 24 on each the boards accommodating the thickness of the hinge

Gulledge does not state that his hinge frame spreader is for installation alignment of a wall structure; however, frame spreaders have a variety of applications for wherever one has a frame which needs to be adjusted. See cited prior art. Applicant is not claiming the combination wall structure and hinged frame spreader.

Claims 2-3 and 5 are objected to as depending upon a rejected claim but would be considered allowable if amended to include the base claim and any intervening claim

of ordinary skill in the art to modify Trevorrow to include the shaped wall to interlock with the raised seam to provide a stronger attachment of the snow guard to the seam as shown by Hockman.
